WORK EXPERIENCE

IHS Markit

Jun 2020 - Aug 2020

Software Engineer Intern/Apprentice

Englewood, CO

Development: Was part of backend Agile team that was developing new product.

- Automated data migration from one database to another with C# script.
- Script parsed data in XML format and converted all mappable attributes to JSON format.

HR Project: Was part of intern team that worked on creating appropriate tagging and key words for better performance of search algorithms in the web for webinars.

- Attended webinars across multiple industries that IHS Markit represents.
- Categorized webinars by titles, dates, industries and areas of interest.

UR Turn

Sep 2020 - May 2021

Student Developer

Remote

Goal-setting and progress-tracking app for high school students and their families-visually interpreting data into an easy-to-understand high guidance dashboard.

- Managed data seeding file for local development/testing
- Created and automated attendance email notifications
- Created attendance sms notification using Twilio API
- Participated in standup meetings in Agile environment, and used Jira board for task assignment

PROJECTS

Trip Planner (JavaScript, React, AWS Lambda/Elasticsearch/S3, Redis)

Developed a web based application that helps users to plan their trip, hosted on Heroku <https://github.com/CUBigDataClass/Trip-Planner>

- Application provides recommendation for flight rates, top spots and weather to visit using Skyscanner API, Yelp API.
- Indexing data and using elasticsearch for efficient search.

Slacker Standup (Java, Heroku)

Developed virtual stand-up app (bot) for Slack channels.

<https://github.com/wawo9193/slacker-standup>

- Allows users to schedule stand-up due dates and times on a specific Slack channel and users.
- Used Slack API for development

ColoradoTransfer (JavaScript, HTML, CSS)

Contributed to local company's website that allows customers to make transportation reservations and pay for them online.

<https://coloradotransfer.com>

- Worked on UI/UX design for certain pages and components.

Portfolio Website (React, GitHub Pages)

Built my portfolio website using react and hosting it on GitHub pages.

<https://artem690.github.io/portfolio/>

LEADERSHIP & TEAM EXPERIENCE

Member of multiple hockey teams for over 14 years. Participated in many volunteer work.

- Managed raffle tickets sales during NBA game
- Assisted in parade for Labor Day event and middle school sporting events
