WORK EXPERIENCE

IHS Markit

Software Engineer Intern/Apprentice

Englewood, CO/remote

June 2020 - August 2020

- Development: Helped working on transferring data that is stored in XML format from one database to another that would store similar data in JSON format. Worked on C# script that reads in and parses XML from database then converts all attributes, that are mappable to a different database, into JSON.
- HR project: Listened/watched webinars across all industries that IHS Markit represents. Broke each webinar down by titles, dates, industries, areas of interest and others, to make sure each webinar has appropriate tagging and key words for better performance of searching algorithms in the web.

Uber

Driver (part-time)

Denver, CO

2017 - Present

- Delivering great customer service by good driving and being friendly to each passenger. Maintaining high rating based on feedbacks.

AWS Certified Developer Associate

Jan 2021 - Expected April 2021

Udemy

Community College of Denver

Associate Degree of Science *GPA: 3.4*

Denver, CO

2016 - 2018

SKILLS

Languages: C++, Java, Python, JavaScript, React, SQL, NoSQL, HTML, CSS, Scala

Others: Bootstrap, AWS services, GitHub, Microsoft Office

PROJECTS

Slacker Standup *Java*

<https://github.com/wawo9193/slacker-standup>

Built virtual stand-up app (channel bot) using Slack API. It allows users to schedule when their standup is due with specific days, times, timezones and etc.

UR Turn *Ruby on Rails, Postgres, HTML/CSS*

<https://www.github.com/urturn/accreditor>

Contributed to a goal-setting and progress-tracking app for high school students and their families—visually interpreting data into an easy-to-understand high school guidance dashboard

ColoradoTransfer *JavaScript, HTML/CSS*

<https://coloradotransfer.com>

Contributed to transportation website that allows customers to make reservations and pay for them online. Customers have a choice of many different destinations.

Portfolio Website *React*

<https://artem690.github.io/portfolio/>

My small portfolio website built using react.js and hosted on github pages.

Trip-Planner *JavaScript, React, AWS Lambda/Elasticsearch/S3*

<https://github.com/CUBigDataClass/Trip-Planner>

A web based application that helps users to plan their trip. Application provides best flight rates, top spots to visit and best weather time. Using multiple APIs to pull data.

LEADERSHIP & TEAM EXPERIENCE & VOLUNTEER EXPERIENCE

Have been a member of multiple hockey teams for over 12 years, volunteer work raffle tickets sales, parade participant, middle school sports events, Labor Day events.
